DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1-20 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

Vanderslice Jr. et al. (US Pat. 6,362,942) discloses a battery 10 including a DC charger power supply 18 connected to a temperature controller 16 that monitors the temperature of the battery 10 via temperature sensor 14 as well as determining the level of voltage of battery 10 via voltage sensor (col. 3, lines 1-44). A DC charger 18 used to provide stored power to battery 10 once the temperature control circuit 16 has determined that the voltage of battery 10 has fallen below a threshold as well as the temperature falling below a threshold (col. 3, lines 25-68; col. 4, lines 1-24). Miller (US Pat. 6,271,648 B1) discloses a vehicle that's operated by a battery 34; battery 34 is connected to a controller 30 and rotor assembly that receives voltage to operate transmission assembly 22 and power the vehicle's driveling 24 (col. 3, lines 16-45). However, neither of the above references nor any other prior art of record disclose in their entirety or in combination the claimed method of transmitting a signal via a transmission device (Phase locked loop) having an associated nominal voltage and being powered at least in party by a battery comprising: predicting if a battery voltage will fall below the nominal voltage during operation of the transmission device; charging an energy storage device with energy from the battery responsive to the predicting step indicating that the battery voltage will fall below the nominal voltage during the operation of the transmission device; and supplementing power from the battery with

Art Unit: 2632

power from the energy storage device during transmission of the signal by the transmission device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davetta W. Goins whose telephone number is 571-272-2957. The examiner can normally be reached on Mon-Fri with every other Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Wu can be reached on 571-272-2964. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/716,311
